- Width: 28"
- Depth: 20"
- Height: 39"

Weight (machine)

- Total: 800 lbs

- Noise level 63 db

- Protection class IP 55

Operating power

- Single phase, 115V, 60Hz, 16A

Top loading balers for packaging waste

This baler is small enough to be placed right where the scrap material is generated in manufacturing and food processing plants. Perfect for cardboard, sacks and other bulky paper products, as well as most plastic materials. A dolly is furnished to eject the bale and for internal transportation.

Capacity

The weight of the bale is dependent on the material being baled. A full bale of cardboard weighs 100-130 lbs. A bale of plastic containers will weigh less, but on the other hand a bale of plastic film can weigh 50 percent more.

*For more info. contact us or visit our website www.orwak.us
We reserve the right to make changes to specifications without prior notice.
Bale/bag/bin weights are dependent upon material type.*
